About me

Progress driven person, who loves contributing to open source through Github. I also enjoy connecting with other developers through meetups like CopenhagenJS and conferences.

Tech Stack

- **Next js**
- **Firebase**
- **Gatsby js**
- **Tailwind css**

Work Experience

Front end Developer - GreenMobility A/S- July 2020 - Februar 2021
I helped with the development of a new GreenMobility Business app built for companies looking for a smarter form of transport. The app makes it easier for companies and employees to drive green and sustainable during working hours.

Junior Wordpress Developer - Yan&Co Aps - Februar 2019 - may 2019
I helped with the development of different websites and also assisted with managing/updating some of our clients WordPress sites.

Customer Telefon Service - july 2016 - november 2017
I talked with different customers and connected them with senior sales people when appropriate. I got a lot of experience with handling stressful situations. The application is optimized for mobile.

Personal Project

Seo Keyword tracker
Build a web application which tracks how many keywords a website ranks for on Google and shows things like how many searches particular keywords recieves on a monthly basis.

Project live: http://xn--seovrktj-m0a7p.dk/

Tv series recommendation
Build a web application that display popular tv series based on user ratings. I built the site using the Next.js and I used the TMD API to fetch data.

Project live: https://seriermanskalse.dk/
Github repository: https://github.com/abdulahiroble/moviecloud

Weather app
Build a web application that shows the weather based on geolocation. I built the site using the React library and I used the Context API in order to manage state.

Project live: https://react-weather-app-two.vercel.app/
Github repository: https://github.com/abdu020/react-weather-app

Medium Articles
I wrote an article about Netlify, which is a hosting platform. The topic is five reasons you might want to consider using it to host your static site. You can check it out through this link:
https://medium.com/@abdulahimohamedroble/5-reasons-to-consider-using-netlify-to-host-your-static-site-469b19926af2

Open Source
I have contributed to https://copenhagenjs.dk/ which is a website dedicated towards the community. You can check out the repository through this link:
https://github.com/copenhagenjs/copenhagenjs.dk

Volunteer work

Mentor - Hack Your Future

I assist the teacher in helping refugees and immigrants learn web development.

https://github.com/orgs/HackYourFuture-CPH/people

Achievements

August 22 2019

I did a presentation held at Microsoft Lyngby as part of a monthly Javascript meetup. The subject of the presentation is *"being a self-taught javascript developer and what have I learned"*. You can watch the video through this link:

https://www.youtube.com/watch?v=_WKukhiZhxs&t=32s.

You can also checkout my powerpoint presentation through this link:
